

Web Service Technologies – Assignment 1

Assignment Title: Individual Assignment

Instructions:

Please read these entire specifications very carefully so that you are fully aware of the requirements.

You have been asked to create a heterogeneous, distributed, service driven web portal bringing together several initiatives from local authorities intended to promote positive values in urban communities. An enterprise such as this will require funding for ongoing operation, maintenance and development.

You are to write an essay of approximately 2,000 words in which you critically evaluate issues and considerations in the operation, maintenance and continues development of this portal, how this can be funded, including the potential for development of revenue streams and anticipation of commercial risk.

You must choose a suitable title for your essay and provide discussion that is specific to issues arising in the portal application as specified with reflective discussion specific to your implementation of the portal.

Your essay must be suitably structured, written in your own words, and develop a clear narrative or argument using appropriate language. All references must be supported by references using IEEE or similar formatting.

Your essay is required to provide 2,000 words plus or minus 5% (100 words), not including the title page or any preamble (e.g., table of contents, abstract) and not including the references.

Submission:

- Your essay must be submitted as a PDF document.

Important Dates:

- Deadline: 2025/12/03
